

## Safety and Security Film from Bristol Glazing

Films Current legislation stipulates that glazing in all non-domestic premises that is deemed to be in a cr

Alternatively, the application of a fully tested Safety Film to the glazing will ensure compliance with the r

- Less expensive with every pane correctly marked
- Existing glazing upgraded in-situ without the disruption of a full reglaze
- Scratch resistant surface to glazing with a factory backed warranty
- Additional Solar Control to reduce heat gain/loss, glare and fading
- Reduces the risk of injury from falling through glass or from flying shards of glass.

Security should also be a major consideration concerning business or domestic properties, especially in

- Acts as a post-impact barrier to frustrate the break-in attempts of the opportunist burglar, thus deterring
- Protects property, reducing the risk of vandalism
- Reduces the risk of injury from flying shards of glass
- Provides Bomb-blast protection to high risk buildings, reducing the effects of an explosion

Storms. Earthquakes. Chemical explosions. Bomb blasts. Theft. Vandalism. All of these events can cause

The addition of films and our safety anchoring restraint systems dramatically improve security for buildings
